

**LISTING OF CLAIMS:**

1. (Canceled)

2. (Currently amended) The ~~heat-resistant crystalline biodegradable resin composition~~ molded article according to claim 13, wherein the aliphatic polyester is at least one of polylactic acid and polybutylene succinate.

3. (Currently amended) The ~~heat-resistant crystalline biodegradable resin composition~~ molded article according to claim 13, wherein the annealing is carried out at or above a glass transition temperature of the aliphatic polyester.

4. (Currently amended) The ~~heat-resistant crystalline biodegradable resin composition~~ molded article according to claim 13, wherein the annealing is carried out at a temperature higher than a glass transition temperature of the aliphatic polyester by at least 15°C.

5. (Currently amended) The ~~heat-resistant crystalline biodegradable resin composition~~ molded article according to claim 13, wherein the modified elastomer comprises a modifying group capable of interacting with a carbonyl group.

6. (Currently amended) The ~~heat-resistant crystalline biodegradable resin composition~~ molded article according to claim 5, wherein the modified elastomer is an ethylene elastomer.
